O R D E R:

In connection with the execution of certain works, like construction of huts, digging of irrigation and drinking water wells, laying of streets, construction of irrigation channels and drains for the Land Colonies for ex-servicemen, the Registrar has stated that it would be economical to get the technical knowledge and advice of the ordinary District staff in carrying out these works wherever necessary. He has requested Government to issue instructions to the Collectors of the Districts where there are Land Colonisation Schemes, to depute on request from the Deputy Registrar of Co-operative Societies concerned the minor irrigation staff in their Districts for guidance and supervision. Where there is no minor irrigation staff in any District the Registrar has suggested that the Public Works Department may be asked to depute its staff.

The Chief Engineer (P.W.D.) has agreed to the proposal of the Registrar for deputing the Staff of P.W.D. for the preparation of the estimates etc. The Board of Revenue has stated that if the items of work are simple, it has no objection to the minor irrigation staff giving their assistance, but that if the work involved consists of several estimates, and check measurements and frequent supervision, a wholetime supervisor may be appointed.

The Government approve the proposals of the Registrar of Co-operative Societies and direct that necessary technical assistance should be given by the Rural Water Supply or Minor Irrigation staff to the land colonisation Cooperative Societies for ex-servicemen, for the preparation of estimates and check measurement. The services of the supervisors of the P.W.Department should be spared to these societies where no minor Irrigation staff is available.

The Registrar is informed that a whole-time overseer should be employed if the work consists of several estimates and checkmeasurements.
